# Install charging stations in your city

Offer a premium service at a competitive price to your citizen

## IT'S FREE

Our operator-investor business model allows cities to offer a quality and fully interoperable charging service with the latest standards without any investment from the city. E55C is growing a charging stations network by investing in infrastructures and getting revenues for charging sessions. This avoids cities the need to mobilize budgetary resources for network management and maintenance.

## IT'S RELIABLE

Our expertise in innovation and remote charging stations management, we guarantee fast installation and effective supervision.

Our economic model is based on the use of charging stations, it is the guarantee for constant functioning and represents a guarantee of reliability.

## IT'S SIMPLE AND WITHOUT ANY COMMITMENT

E55C offers you a simple legal model that can be implemented in a few weeks.

You can end the partnership at any time without any compensation.

## INTEROPERABILITY AND SUPERVISION

Our network is fully interoperable. This gives the user the possibility to charge his vehicle on the E55C charging station, regardless of the mobility operator he has chosen without prerequisites. This approach makes it possible to offer a service accessible to all and to guarantee an intuitive and adapted charging experience for everyone.

WHY CHOOSE ELECTRIC 55 CHARGING?

# The steps

1

## FIRST CONTACT

We listen to your community's needs and we determine with you the best ways to match them. (We agree with you on charging stations locations, number of charging points, type of charging station, etc.).

2

## AUTORISATION D'OCCUPATION TEMPORAIRE

To do so, we contractualize through a simple legal model: the Autorisation Temporaire du Domaine Public.

3

## WE TAKE CARE OF EVERYTHING

We carry all the investments related to the deployment of charging stations and guarantee an effective supervision.

**35** cities in France  
**400** points of charge  
**20** countries  
**2000** fast charging stations managed for third parties  
**20 000** users
